

Acel Technologies General Capability Statement

Global field services for mission critical satellite and telecom networks

19+ Years of Experience	100+ Countries Supported	2,000+ Remote Sites Deployed	24/7 Field Coordination
-----------------------------------	------------------------------------	--	-----------------------------------

Company Overview

Acel Technologies helps satellite operators, telecommunications providers, integrators, governments, and international organizations deploy, operate, and sustain critical communications infrastructure. Acel coordinates local field resources, logistics, installation, commissioning, infrastructure, and lifecycle maintenance across Africa, Asia-Pacific, Latin America, the Middle East, and other difficult-to-serve markets.

Core Capabilities	Why Acel
• LEO, MEO, GEO, VSAT, hub, and terminal deployment • Site and RF surveys, permitting, and readiness assessments • Importation, customs coordination, warehousing, and last-mile delivery • Installation, integration, testing, and commissioning • Towers, shelters, civil works, electrical systems, and solar or hybrid power • Preventive and corrective maintenance, spares, and SLA-based response	• One accountable partner from site assessment through long-term support • Experienced local resources in remote and operationally demanding markets • Regional knowledge for logistics, regulatory, and access challenges • Scalable multi-country field coordination and standardized execution • More than 18 years supporting PCCW satellite infrastructure worldwide • ISO 9001 registered and recognized as an SES Certified Partner

Selected Experience

Africa 70+ satellite sites across Chad and Mali, including warehousing, delivery, installation, commissioning, and 24/7 SLA-backed maintenance.	Asia-Pacific VSAT installation, commissioning, and lifecycle maintenance across remote island and inland markets from Papua New Guinea to New Zealand.	Mission Critical Support Communications infrastructure for humanitarian organizations, diplomatic missions, development agencies, MNOs, and satellite operators.
